

Client Meeting - April 1st, 11:30 - 11:50 am PST

Team updates for the client:

- Bug fixes: New search result modal display; Exiting some modals should cancel action instead of execute them
- Approach of article tracking using percentage depths does not work well with articles with a lot of images. New approach needed
- More loading animations
- ECO tracker display: Overall score now shows how many points out of; Some pop up instructions explaining the scoring

Client updates and questions:

- List of sections for ECO solutions not exhaustive, clients might want more solutions in the future
- The client can handle IOS deployment
- Clients will send list of section and article names for URL naming
