

Cyclops(0) Meeting

Date: March 23rd/2022

Attendees:

Jiang Zhuoxuan
Sumeet Bajwa
Megan Nyugen
Larry Gu

1. Project

Individual Tasks Worked on:

- **Larry**

- Eco Tracker Update
 - New Filter: User can filter solutions based on completeness
 - Score Calculation: The “Overall Score” slot now displays the aggregated eco solution score.
 - Responsive Website Design: Filters in accordion available for filters on phone
 - Remote Database interaction:
 - Solutions and User selection history stored on database
 - Data fetching from remote database implemented
 - User can submit solution (with default score 1)
 - System Visibility: Information remote and local matches
- PWA deploy with Eric
- Bug Fixing:
 - Eco Tracker Filter

- **Eric**

- Update User’s Total Eco Score to Database
- Display User’s Total Eco Score on the User Profile Page, Main Page

- Responsive Design for the Eco Solution Filter
- Login Validation for the Eco Page
- Open new tap for the survey link
- Bugs fix: Errors when Eco-tracker page get data from database

- **Sumeet**
 - Eco Tracker Forms
 - Reformatted Data for Eco tracker forms
 - Filtering through Section, Stars
 - Assigned Score to solutions available on eco tracker form
- **Megan**
 - Tracking user's read articles
 - "Pick up where you left off feature"

Blockers + Surprises

2. Learning

- Firebase documentation <https://firebase.google.com/docs>

3. Plan

Individual Tasks:

- **Larry**

- Finish the Eco Tracker
 - Submit solution with different score
 - Implement solution update feature
- Deploy Android Version

- **Eric**

- May add feature to modify the Eco Solution (Not sure the client needs this feature)
- Build the android and IOS Version (I have deployed the web version last week: cyclopediapp.web.app Sorry for the missing the meeting due to the daylight time change)

- **Sumeet**

- Finish Styling on Eco tracker form
 - Dynamic color changing on Ionic range slider
- Debug Eco tracker form
 - Possible switch from modal to page format for forms

- **Megan**

- ● Tracking user's read articles
 - ○ 'Pick up where you left off feature'
 - ■ Handle edge case of when all articles are read
 - ■ Open articles in the right segment and depth
- ● Peer testing: make sign up option more visible
- ● Style eco tracker page when not logged in

Learning activities proposed for this week:

Requirements Milestone:

1. Start work on Final Report, which is due end of the term.
