

Client Meeting - March 18th, 11:30 - 11:50 am PST

Team updates for the client:

- We have successfully deployed the website which is currently on these free domains:
 - [Cyclopediapp.web.app](https://cyclopediapp.web.app)
 - [Cyclopediapp.firebaseio.com](https://cyclopediapp.firebaseio.com)
 - Pricing list for domain names available (cyclopsapp.org and thecyclops.org both 17\$/year through Firebase)
- More filtering options for the main ECO Tracker page (sort by ascending/descending stars, section, completion progress, etc.), and progress on ECO form.
- Article tracking implemented: Go to the latest read article, if that article is completed then go to the first partially read article, if there are no partially read articles then go to the first unread article.
- ECO score calculations partially implemented
- new drop-down 'accordion' view of the ECO filters - reorganized home page

Client updates and questions:

- After our tech lead discussed the presentation of the filters with our client, it was decided that the accordion filter would be kept for mobile layout, and in desktop layout, the filters would be fully laid out
- For the 'Pick up where you left off' feature, handle the edge case where
- Client likes the idea of coloured leaves, and reminded us to use labels for clarity
- Client reminded us to implement the overall total score and the section total for the ECO tracker
- Open surveys in new tab
- Hide options for eco tracker when logged out
