

Client Meeting - October 6thth, 1:30 - 2:00pm PST

- We presented to the client the first draft of the wireframe and explained how different Ionic components would be used to achieve the features detailed by the client.
- We also presented the base application that contains some placeholder components initialized with Ionic.
- The client was happy with our progress and contacted the group afterwards with some additional features they want to add to the UI mockup. The revised mockup and progress on the base project will be presented to the client in the next meeting.
