

Client Meeting - October 27th, 1:30 - 1:45pm PST

- We showed the client the new Cyclops project with the slides and card components combined.
- We let them know what other components we are working on this week, which are the progress indicators, a search bar, segments, and popovers.
- The client informed us that they're now incorporated as CyclopediApp. The current domain is cyclopediapp.org. The old domain encyclopedia2.com automatically redirects to the new one.
- New change to current website: the "Take Action" section has been changed to "Chip in".
