

# Cyclops(0) Meeting

**Date:** September 29th, 2021

**Attendees:**

Jiang Zhuoxuan  
Sumeet Bajwa  
Megan Nyugen  
Larry Gu

## 1. Project

### Progress

- This week was mostly about finding tutorials on the fundamentals of javascript to gain extra knowledge
  - **Larry** - JavaScript Fundamentals, Async Programming
  - **Eric** - Array Methods (forEach , map, filter, etc
  - **Megan** - Fetch API / HTTP Requests
  - **Sumeet** - NPM
- Created a Rough plan for the client
  - Decided on Ionic as our main building tool
- Researched which javascript framework we as a group wanted to work on
  - Decided on Angular

### Blockers + Surprises

- Everything for this week was completed on schedule
- Tutorials were delivered at the meeting on the 29th
- Came to a group conclusion for the javascript framework

## 2. Learning Activity

- Learning activity for this week was like said above just each member finding tutorials for their chosen topic
- Research which javascript framework to work on

### 3. Plan

#### **Task for this week:**

- Refresher courses on coursera
  - javascript
  - Angular
- Take a look at Ionic and decide which UI Components we can use to solve each needed feature
- No Specific task for any group member this week
  - Everyone is working on the same tasks.
- Insert tutorial links into GitHub Repo for gitsats report due on Friday

#### **Learning activities proposed for this week:**

1. Get an idea for the different UI Components on Ionic
  - How we can use them to deliver the features required for Cyclops
