

Cyclops(0) Meeting

Date: October 6th, 2021

Attendees:

Jiang Zhuoxuan
Sumeet Bajwa
Megan Nyugen
Larry Gu

1. Project

Progress

- Finished week 1 tutorials for JavaScript
 - HTML basics
- Tutorials are all in discord
 - Main videos uploaded onto github README
- Looked at basic tutorial for Ionic
 - Simple application creation
 - How UI components will work

Blockers + Surprises

- Everything for this week was completed on schedule
- Sumeet was having issues running ionic serve command in terminal
 - Being worked on for this week

2. Learning Activity

- Larry demonstrated how project will work with Ionic
 - How we can generate UI components for application
 - Dependency Injections

3. Plan

Task for this week:

- Refresher courses on coursera
 - JavaScript weeks 2 and 3
 - Week 2 is Css, Week 3 is client interaction/managing
 - Week 1 of Angular Course up until Angular Components
- Start Work on Requirements presentation and PDF file
 - Presentation will be a recorded video
 - Split presentation recording into 4 different parts
- Individual Tasks
 - **Larry** is Working on UML diagram for presentation/PDF, How we will test the developed features as well
 - **Megan** is creating rough wireframe design draft for application to show clients during client meeting this week
- Submit Screenshots for weeks 1,2,3 JavaScript tutorials

Learning activities proposed for this week:

1. Main focus is definitely on the angular coursera course, to get a starting idea on how angular will work for when we start creating the application.
2. Refreshing materials from JavaScript course, so older materials are up to date.

Goals for Requirements Milestone:

1. Presentation due morning of October 13th
2. Group evaluations of other groups presentations due October 15th at midnight
3. Completed PDF due October 20th
