

Client Meeting - October 13th, 1:30 - 1:45pm PST

- Presented the updated UI mockup based on the client's feedback last week
- Suggested a database option to the client: MongoDB.
 - The client would like us to look into the MongoDB serverless option, and give them an estimate on how much data we will be hosting.
- Updated the client that we're currently familiarizing ourselves with angular
 - The client would like to know updates on how we will fetch data from the website
