

Client Meeting - March 11th, 11:30 - 11:50 am PST

Team updates for the client:

- Started to work on feedback from peer testing regarding visibility of system status
- Bug fixing for final PWA build
- ECO solution and individual grading organization in the database

Client updates and questions:

- Edit page looks good, client wants to know if you can upload images, which I informed them that we are working on that
- The scrollable segment looks good
- Eco tracker solutions: include the description for each solution found on the website (maybe display them on the cards). Also reminded us to add the corresponding eco-solutions to each article as their own segment
