Cyclops(0) Meeting

Date: March 30th/2022
Attendees:
      Jiang Zhuoxuan
      Sumeet Bajwa
      Megan Nyugen
      Larry Gu

1. Project

Individual Tasks Worked on:

- **Larry**
    - Eco Tracker Update
        - Users are able to update their personal scores (/weight) of the attended solutions now
        - Admins are able to update and remove Eco Tracker solutions
        - Under all circumstances (user's solution weight update, admin's solution remove, admin's solution star change, etc), user's overall score would display correctly. And changes are updated both locally and remotely, so both scores would match.
    - Responsive Website Design:
        - The Eco Tracker Page:
            - Phone users and desktop users will see respectively optimized filter layout
            - Solution items' width are updated to be responsive so that all the text are readable under all screen sizes.
        - All Pages are optimized under ultra-wide screens (2k-4k)
    - Bug Fixing:
        - Fix a bug which caused clicking on the backdrop of a form resulting in accidently submitting the form.

- **Eric**

  - May add feature to modify the Eco Solution (Not sure the client needs this feature)

  - Build the android and IOS Version (I have deployed the web version last week: cyclopediapp.web.app Sorry for the missing the meeting due to the daylight time change)

- **Sumeet**
  - Eco Tracker Forms finished
  - Eco Tracker Form bugs fixed
- **Megan**
  - ● Tracking user's read articles
    - ○ 'Pick up where you left off feature'
      - ■ Handle edge case of when all articles are read
      - ■ Open articles in the right segment and depth
  - ● Peer testing: make sign up option more visible
  - ● Style eco tracker page when not logged in

Blockers + Surprises

2. Learning
-Firebase documentation https://firebase.google.com/docs

3. Plan

Individual Tasks:

- **Larry**
  - Eco Tracker
    - Eco Solution Addition
  - Requirements from clients:
    - Routing information update: more readable urls
    - Article Text Editor update: user inserted links should open pages in new tabs
  - Admin Article Edit Feature
    - Layout Update to match Eco Tracker

- **Eric**
  - Eco Tracker Tab work
  - Android Set up
  - Editing Solutions on Eco Tracker Tab
- **Sumeet**
  - Upload needed data to eco tracker data files
  - Extra styling for eco tracker form
- **Megan-**
  - ● Taskbar bug fix:
    - ○ Remove the ionfocus and ionblur event, replace the search results with a page component
  - ● Position jump feature implemented, smooth transition between mobile and desktop views
  - ● Peer testing: make sign up option more visible

Learning activities proposed for this week:

Requirements Milestone:
1. Continue work on Final Report,
