Client Meeting - January 21st, 11:30 - 11:45 am PST

Team updates for the client:

- Database: currently hosting and administering a test database with PHPMyAdmin and apache. method to grab and post test data to the database. Currently also looking into Firebase for database options.
- Article editor: RTE component has been implemented. Styling functionalities work, and can add and remove article segments.
- Website mockup finished and shared with the client. Currently working on implementing the responsive design aspect.

Client updates and questions:

- The client's main new feature is the surveys.
- The client asked about progress on popovers.
- The client is still working on ECO tracker weightings, currently placeholder values are fine.
