Cyclops(0) Meeting

Date: April 6thth/2022
Attendees:
Jiang Zhuoxuan
Sumeet Bajwa
Megan Nyugen
Larry Gu

1. Project

<u>Individual Tasks Worked on:</u>

- **Larry**
    - Eco Tracker
        - Eco Solution Addition
    - Requirements from clients:
        - Routing information update: more readable urls
        - Article Text Editor update: user inserted links should open pages in new tabs
    - Admin Article Edit Feature
        - Layout Update to match Eco Tracker

- **Eric**

    -Implement the backend of edit/delete/add section of Eco-solution feature.

    -UI Improvement – Before: The description of the solution only displays partially if it is too long. Now: The exceed part will be hidden and replaced by a button. When user click the button, the complete description will be displayed

- **Sumeet**
    - Updating names for individual page routing

- **Megan**
  - - ● Taskbar bug fix:
    - - ○ Remove the ionfocus and ionblur event, replace the search results with a page component
  - - ● Position jump feature implemented, smooth transition between mobile and desktop views
  - - ● Peer testing: make sign up option more visible

Blockers + Surprises

2. Learning

-Firebase documentation https://firebase.google.com/docs

3. Plan

Individual Tasks:

- **Larry**
  - - Eco Tracker
    - ▪ Eco Solution Addition
  - - Working on Eco Tracker Tab

- **Eric**
  - ○ - Maybe manually add all articles and Eco-solutions from the client website to our project
- **Sumeet**
  - - Continue working on and updating names for individual page routing
- **Megan-**

- ○ Make sign up option more visible
- ○ - Style taskbar (DONE)
- ○ - Display corresponding ECO solutions in articles
  - Pick up where you left off - explore a solution to jump to headings

Learning activities proposed for this week:

Requirements Milestone:
1. Finish final report that is Due on Friday April 8th.
