Client Meeting - February 18th, 11:30 - 11:50 am PST

Team updates for the client:

- User profile base available to display eco tracking information, reset password, etc.
- Authentication guard: prevents users from accessing an unauthorized page by URL
- Eco tracker: Demo of the range slider
- Article page: Accordion implementation - article sections presented in drop-down format (possible solution for limited segment display space on mobile)
- Article tracking fully implemented

Client updates and questions:

- Client noted that username and picture not necessary
- Client prefers the segment bar instead of accordion, and suggested we use a dropdown menu to deal with the space issue
